Re: Annual Use Certification
FCC Form 481, Carrier Annual Reporting, 47 C.F.R. §54.202, §54.313 and §54.422
WC Docket Nos. 10-90 and 11-42

Dear Ms. Dortch,

Enclosed for filing in FCC Docket No. 96-45 is an Affidavit certifying that all federal high-cost support provided to North Dakota Network Company was used in the preceding calendar year and will be used in the coming calendar year only for the provision, maintenance, and upgrading of facilities and services for which the support is intended.

The undersigned carrier has also filed this Affidavit with the North Dakota Public Service Commission, and it is anticipated that the North Dakota Public Service Commission will also certify by December 16, 2013 that the undersigned carrier will only use said universal service support for its intended purpose. However, because of the importance of this issue, and the fast-approaching certification deadline of December 16, 2013, the undersigned carrier is also providing certification directly to the Federal Communications Commission to ensure that the undersigned carrier continues to receive the universal service support for which it is eligible.

Also enclosed is FCC Form 481, Carrier Annual Reporting Data Collection Form, for the 2014 Program Year, pursuant to 47 C.F.R., §54.202, §54.313, and §54.422. This form has also been filed with the Universal Service Administrative Company, and the North Dakota Public Service Commission.

Signed,

Steven D. Lysne
CEO/General Manager

North Dakota Network Co. (dba SRT Wireless) has battery back up in the Host Central Office and all Cell Site locations that provide at least 8 hours battery back up in the event of a commercial power failure. In addition, the Host Central Office and many Cell Site locations have diesel or natural gas electric generators to support the cell site in the case of an extended power outage. Those Cell Sites that do not have on site generators can be supported by portable generators via a generator plug and transfer switch.

All Cell Sites utilize the Public Switched Telephone Network to connect to the Host MSC switch. SRT Wireless relies on the SONET ring architecture of the serving telephone company to provide protected redundant routes to Cell Sites. Traffic is monitored monthly to ensure busy hour calls failures are kept to a minimum and Cell Sites have voice capacity to support normal business operations and unexpected high traffic events.

Short term emergency situations are monitored by the Network Operations Center, 24 hours per day, 365 days per year. Extended, critical, or time-sensitive emergency situations involve the SRT Crisis Management Team which responds with all required resources up to the executive level.
